

# Secure File Transfer

Your employees use cloud services like WeTransfer to send large or sensitive files. They often do not realize that these files are sent into the cloud unsecured. In many cases this can be a threat to your organization especially when you have to be compliant to the GDPR.

Starting today, use FileCap to send large and sensitive files safely and 'cloudless'!

## Use the FileCap Outlook add-in

- Send your emails as usual, but now with attachments of **10 GB** or more
- No longer a full mailbox because of large attachments
- Invite people outside your organization to safely send files to **you**
- 6HQGDQGUHFHLYHHPDLOPHVVDHIVIXOOBQFUSWHG

## Discover the user friendly FileCap portal

- By using the FileCap portal people outside your organization can send large files to **you**
- Use a password for extra security
- Two-factor authentication through SMS.
- Download documents separately or all at once as a ZIP file.

## FileCap: maximum security and optimal usability, all in one.

By using FileCap you can rest assured that your files are only available to the intended recipients. FileCap uses advanced encryption techniques for sending your files. The files that you sent are encrypted and stored on your own FileCap sever, within your own secured network.

# More possibilities, the same ease of use.

FileCap is continuously developing new features. For this, the input of our customers is essential. Does your staff use iOS devices for work purposes on a regular basis? The new FileCap app and Mac client provide the most important FileCap features for iPhone/iPad and Mac users. Furthermore, FileCap developed an add-in for Sharepoint and a Windows plug-in.

FileCap is available in the languages Dutch - English - German - Swedish - Spanish - Italian - French - Finnish

## Windows plug-in

- Send large files directly from Windows Explorer!
- Invite customers and suppliers from Windows to send u files.
- No email client required.

## Now also for Apple: the FileCap app and Mac client

- Send large files directly from your iPhone/iPad or Mac.
- Invite externals to send u large files safely.
- Suitable for iOS 7 or higher.

## Activate your FileCap server and these features within 4 hours

FileCap contains an amazing set of possibilities. Try before you buy? Contact FileCap for a free 30-day trial version! We'll provide you with a complete FileCap installation package. You will be able to install your FileCap server within 4 hours!
